Kodluyoruz Advanced MSSQL & Oracle SQL Bootcamp, Istanbul **Nov 2020 – Dec 2020**

PROJECTS

Water Outage Bot for Telegram **Aug 2020**
Technologies: Python, Telegram API, Requests, BeautifulSoup, Google Cloud
Features: It was made to inform users of the planned water cuts announced by ISKI (Istanbul Water and Sewerage Administration).

Flashcard Desktop App **Jun 2020**
Technologies: Python, PyQt5
Features: This application was designed as a desktop application to be used for memorizing words while learning languages. The data was kept in json type and the word memorization of the user was made easier with the 'Flashcard' logic.

Cleaning Covid-19 Data with SSIS **Jun 2020**
Technologies: MsSQL, SSIS, Tableau
Features: Cleaning covid data from all over the world with ETL package in SSIS. The data cleaned at the end of the process were visualized using Tableau after being uploaded to the database.
